EXECUTIVE SUMMARY

Full-stack software engineer with production experience shipping backend APIs, CI/CD pipelines, and B2B web applications at Lontra Tech and VistaVu Solutions, paired with applied ML/AI research depth from an M.Sc. in Electrical & Computer Engineering (AI specialization) at the University of Waterloo. Builds and iterates quickly with AI-native development tools (Google Antigravity, Cursor), moving from business requirements to working, tested prototypes. Seeking the Applied Development co-op at Mawer to build internal applications, workflow automation, and AI-enabled solutions alongside Investment Operations subject-matter experts.

EDUCATION

M.Sc. Electrical & Computer Engineering, Specialization in AI Jan 2025 – Apr 2027

University of Waterloo

Coursework: Machine Learning · Data & Knowledge Modelling · Database Systems · Quantitative Methods

B.Sc. Software Engineering, With Distinction Sept 2018 – May 2023

University of Calgary, Schulich School of Engineering

Coursework: Data Structures & Algorithms · Scalable Data Analytics · Data Science · Operating Systems · Distributed & Embedded Systems

RELEVANT SKILLS

Languages & Scripting: Python · SQL · JavaScript · TypeScript · C++ · Java

AI-Assisted Development: Google Antigravity (agentic AI IDE, used daily for feature development, debugging, and automated browser testing) · Cursor · OpenAI API · Prompt Design & Agent Workflows

Application & Integration Development: REST APIs · Relational Databases · Data Transformation · Web Application Development · CI/CD · Git

Data & ML: PyTorch · Scikit-Learn · XGBoost · Pandas · NumPy · PySpark · Evaluation Metrics (Precision/Recall/F1/AUC-ROC)

Collaboration & Process: Requirements Gathering · Agile/Scrum · Cross-Functional Stakeholder Communication · Technical Documentation

Cloud & Platforms: AWS (S3, DynamoDB, Lambda, CodePipeline, EC2)

EXPERIENCE

Web Developer | Lontra Tech May 2023 – May 2025

- Owned full-stack delivery end-to-end for small-business clients — requirements gathering, development, and post-launch support — translating business needs into working software quickly and independently.
- Built and integrated backend APIs and third-party services across concurrent projects in a fast-paced, priorities-shifting environment, consistently hitting delivery targets.
- Used AI-native development tools (Google Antigravity, Cursor) to plan, implement, and verify features faster — including agentic browser testing to validate changes before handoff, directly relevant to piloting AI-enabled solutions in a live operational setting.

Software Developer | VistaVu Solutions Jan 2024 – Apr 2024

- Built and maintained a full-stack B2B web application, working alongside engineering stakeholders to bridge functional requirements and production implementation — the same requirements-to-prototype workflow this role calls for.
- Maintained CI/CD data pipelines on AWS (CodePipeline, S3, EC2), gaining hands-on experience processing and delivering data reliably across environments.
- Automated shipment tracking and label generation via the RocketShipIt API, cutting manual processing time — direct experience turning a manual operational task into an automated workflow.
- Actively participated in Agile ceremonies, collaborating cross-functionally with non-technical stakeholders to keep delivery on track and adapt to changing priorities.

PROJECTS

Predictive Modeling of Stroke Probability Aug 2025

Python · PyTorch · XGBoost · Scikit-Learn

- Built an evaluation pipeline comparing multiple classifiers (Logistic Regression, Decision Tree, KNN, XGBoost) on an imbalanced dataset, measuring performance via precision, recall, F1, and AUC-ROC — hands-on exception-scenario and data-quality thinking applicable to operations data.
- Applied SMOTE oversampling and GridSearchCV hyperparameter tuning for model optimization.

Anomaly Detection on FashionMNIST

Apr 2025

Python · PyTorch · PCA · t-SNE · K-Means

- Analyzed a large dataset with PCA, t-SNE, and K-Means clustering to surface and visualize anomalous patterns — the same exception-detection mindset needed for reconciliations and data-quality checks.

Hair Type Detector — CNN Image & Video Classifier

2025

Python · PyTorch · CNN · Kaggle

- Built a CNN classifier and real-time inference pipeline end-to-end — preprocessing, training, evaluation, and deployment — demonstrating the full build-to-pilot cycle this role requires.

Graduate Unofficial Transcript

Name: **Haque, Rifat**
Student ID: **21173068**
Ontario Education Nbr: **535596498**

Beginning of Graduate Record

Winter 2025

Program: Electrical & Computer Engineering, MEng
Attendance: Full-Time Term: 1.00 Status: Enrolment

Course		Description	Attempted	Earned	Grade
ACINTY	620	Academic Integrity Module	0.00	0.00	CR
Instructor:		Julie Piatek			
ECE	656	Database Systems	0.50	0.50	77
Instructor:		Wojciech Golab			
ECE	657A	Data & Knowledge Modelling & Analysis	0.50	0.50	78
Instructor:		Mark Crowley			
GS	-	Continuing Graduate Studies	0.00	0.00	
Term GPA		77.50			
Cumulative GPA		77.50			

Spring 2025

Program: Electrical & Computer Engineering, MEng
Attendance: Full-Time Term: 2.00 Status: Enrolment

Course		Description	Attempted	Earned	Grade
ECE	608	Quantitative Methods in Biomedical Engineering	0.50	0.50	81
Instructor:		Liang-Liang Xie			
ECE	657	Introduction to Machine Learning	0.50	0.50	83
Instructor:		Amir-Hossein Karimi			
GS	-	Continuing Graduate Studies	0.00	0.00	
Term GPA		82.00			
Cumulative GPA		79.75			

Fall 2025

Program: Electrical & Computer Engineering, MEng
Attendance: Full-Time Term: 2.00 Status: Inactive

Course		Description	Attempted	Earned	Grade
GS	~	Leave of Absence	0.00	0.00	
Term GPA		0.00			
Cumulative GPA		79.75			

Winter 2026

Program: Electrical & Computer Engineering, MEng
Attendance: Full-Time Term: 2.00 Status: Inactive

Course		Description	Attempted	Earned	Grade
GS	~	Leave of Absence	0.00	0.00	
Term GPA		0.00			
Cumulative GPA		79.75
